RE: **22-28038-RNVN at 1225 Fern St**

A Stop Work Order has been issued for this permit and the permit has been rescinded. According to photographs, a portion of the second story of the rear of the structure was added onto. This increased the floor area of the structure, which requires approval of a conditional use. None of this information was included in the permit scope of work or in the submitted plans, so this permit is being rescinded for material misrepresentation. A new building permit is required and a conditional use approval will be required before a permit can be issued.
